

DIGITAL MICROSCOPE

# TAGARNO PRESTIGE

The PRESTIGE is not just advanced technology. It is also personal technology at your service. Intuitive, agile, and customizable. Tailor it to fit your needs perfectly.

“ We can see the **smallest details** and ensure the quality of our work

Bo Aktor Nielsen, Engineer  
**BB Electronics, Denmark**

**TAGARNO**

TAGARNO PRESTIGE

## Effective quality control

Using a digital microscope makes everything stand out.

With a digital microscope, you can see your PCB, metal or plastic part in extremely high image quality, no matter the magnification level.

The clear images make it easier to perform processes such as seed germination testing, variety identification and purity determination. Foreign varieties, mites or fungal diseases in your sample will also be easy to spot.

The built-in computer allows you to use apps during the inspection and take photos of your work.

The setup with a monitor is also more comfortable and less tiring for the operator, creating healthier and happier employees.

“**Our employees chose the TAGARNO because of its user friendliness**”

Loïc Boutillier, Technician Methods  
**ALL CIRCUITS, France**

TAGARNO PRESTIGE

# An intelligent digital microscope

The PRESTIGE has a built-in computer that turns this microscope into much more than just a magnification tool.

## All-in-one

A microscope, a computer and an analyzer.  
This is an all-in-one solution with a selection of apps available.

## Fine adjustment

Find your focus with the fine adjustment wheels.

## Stability at any height

No matter what height you adjust the microscope to, the arm creates stability at any all magnification levels

## ESD

The microscope has ESD grounding point.

Tech specs

# Take a closer look

Perform firmware updates for ongoing improvements and adding features to the intelligent microscope.

<b>Magnification levels</b>	1.7 – 660x +
<b>Image quality</b>	FHD/1080p +
<b>Frame rates</b>	60FPS +
<b>Optical zoom</b>	30x +
<b>Working depth</b>	150 mm +
<b>Working height</b>	33.5 – 288 mm +
<b>Field of view</b>	0.8 – 306.8 mm +

**660x**  
Magnification level

Applications

# Intelligent microscope sees smarter

With a wide range of automated apps, a TAGARNO microscope can optimize your analysis work and create more precise and objective results.

“Saving images directly to the microscope has **increased our efficiency**”

Bo Aktor Nielsen, Engineer  
**BB Electronics, Denmark**

#### Case study

## Our TAGARNOS are vital tools for PCB inspection

**BB ELECTRONICS, DENMARK**

After using stereo microscopes and magnifying lamps in the past, BB Electronics wanted a better and more contemporary solution.

A key benefit from a digital microscope is the ability to save and share high quality documentation with customers when performing visual inspection of production line circuit board samples.

The microscopes are also used for R&D prototype development as well as PCB repairs and rework.

After testing a wide range of digital microscopes, they chose TAGARNO because of the overall high quality solution and user friendliness.

Available options

# Choose a solution that suits your needs

The perfect package

# Customize your choice

Mix and match. Add any accessory and apps to your bundle and you are off.

	PRESTIGE	PRESTIGE PRO	
<b>Included Apps</b>	<b>TAGARNO PRESTIGE digital microscope</b>	●	●
	Watermark application	●	●
	Focus stacking application	●	●
	Ruler application	●	●
<b>Included Accessories</b>	Lens +4	●	●
	XPLUS control box	●	●
	Ring light white and Lights control box	●	●
	Diffusor lens for Ring light white	●	●
	Fresnel 100mm lens kit + Polarizer filter kit for Ring light white	●	●
	Lens +10 and magnetic lens kit	●	●

## Microscope

## Accessories

### Ring light (white)

View every little detail

### Ring light (UV)

Check conformal coating and cracks

### Lens 1x Plan

Magnify at the right level

### Tilting table

See sample from all angles

## Apps

### Measurement

Measure distances, angles, diameters and more

### Image comparison

Compare sample to reference image

### Focus stacking

Create ultra-sharp images with no blurred or out of focus areas
